

compilation

What about compilation, is that much different?

$$2 + 2$$

```
console.log('Hello, World')
```

```
await fs.readFile('boo.txt')
```

4

undefined

Buffer<FF FF FF FF ...>

Hello, World

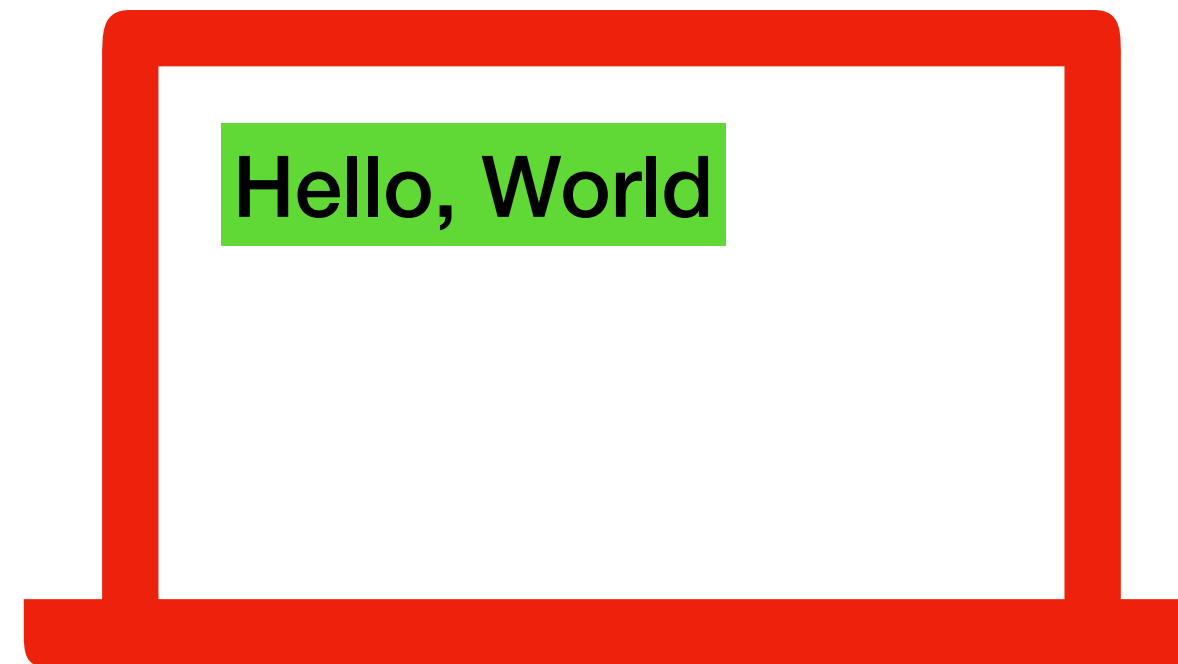

Compilation

What about compilation, is that so much differs?

2 + 2

`console.log('Hello, World')`

`await fs.readFile('boo.txt')`

Hello, World

4

undefined

Buffer<FF FF FF FF ...>

**Interpretation happens on the fly
in runtime**
